What we [doctors](#) is, the problem is not Google or the patients fail to understand if it is the fact is this is going to persist. who search Google for their problems, and even wrong information that is there and the way to The problem is the false and confusing or general with more and more genuine and authentic counter it is to provide the people in proper choices for their problems, especially information. So that it helps them in making options by a different set of doctors. If when they are being advised different treatment totally confused and clueless about what to do we see from their perspective, they feel give a different opinion about their treatment. when different qualified and expert doctors of understanding the problems they are facing, To believe that someone is not capable is a big mistake. So we as doctors should and not capable of making an informed decision problems as possible, in a language that to get as much information about different strive person. This will not only help them make better is easily understood by a non-medical patients to the advice of doctors as they will decisions, this will improve the compliance of

understand the reason behind the advice.

also increases, as they are now the activeBut with this, the responsibility of the patient need to learn the art of understanding what ispartner in their own treatment. They genuine and what is fake.

them to a wrong treatment. sñneitap A lot ofcomplaint that some doctors misguided patients had opinions of multiple doctors andFrom my experience I can say, all such who gave them proper guidance. But they chose toamong these doctors were also those advice, either deliberately or out of their poorfollow the one who gave the wrong who is to blame, it is very clear that only theknowledge. Not going into the discussion it the responsibility of both the public and thepatients are at an immediate loss. But in need of guidance should get a correct one. Wedoctors both to make sure that people just the ability to read and write. Literacy inare in a new age and literacy is no more lines, and the ability to send a true sýadottime is the ability to read between the louder the wrong ones. The onus is on all of us,message in a stronger way such that it is and surely we will achieve that mark.
